JAY AMBEY
HYDRAULICS

ESTABLISHED
2010

COMPANY PROFILE

JAI AMBEY HYDRAULICS, established in 2010, is a trusted and growing manufacturer of all types of drilling rigs and drilling equipment, serving the needs of the drilling, mining, water well, and infrastructure sectors across India. With over a decade of hands-on engineering experience, the company has earned a strong reputation for quality manufacturing, robust design, and dependable performance. Based in Bhilwara, Rajasthan, Jai Ambey Hydraulics specializes in designing and manufacturing a wide range of drilling solutions tailored to diverse geological and operational requirements. The product portfolio includes DTH and DTHR drilling rigs, core drilling rigs, excavator-mounted blast hole drilling rigs, truck-mounted and track-mounted rigs, and customized hydraulic drilling machines. Each rig is engineered to deliver high efficiency, powerful output, and long service life, even in demanding field conditions. At Jai Ambey Hydraulics, quality and innovation go hand in hand. The company uses high-grade materials, precision machining, and advanced hydraulic systems to ensure consistent performance and low maintenance.

Every machine is developed with a focus on operator safety, ease of operation, and maximum drilling productivity. Customer satisfaction remains the core philosophy of the company. Jai Ambey Hydraulics works closely with contractors, mining companies, and project operators to provide custom-built drilling solutions, reliable after-sales support, and technical guidance. This customer-centric approach has helped the company build long-term relationships and a loyal client base nationwide. Driven by commitment, technical expertise, and continuous improvement, Jai Ambey Hydraulics continues to expand its capabilities and product range, contributing to the growth of India's drilling and mining industry. Jai Ambey Hydraulics – Engineering Strength, Drilling Excellence.

JAI AMBEY HYDRAULICS – Excavator Mounted Blast Hole Drilling RigThe Jai Ambey Hydraulics Excavator Mounted Blast Hole Drilling Rig is engineered for powerful, precise, and efficient blasting operations. Designed for rugged mining and construction environments, it delivers high penetration rates, stable performance, and easy maneuverability, ensuring reliable drilling even in the toughest rock conditions.Jai Ambey Hydraulics – Strength, Precision, and Performance in Every Hole.

Jai Ambey Hydraulics DTH / DTHR drilling machinesJai Ambey Hydraulics designs and manufactures high-performance DTH / DTHR drilling machines capable of drilling from 700 meters up to 2000 meters, with hole diameters ranging from 4 inches to 24 inches.Engineered with robust construction and advanced hydraulic systems, our machines deliver powerful output, reliable operation, and unmatched drilling performance even in the toughest ground conditions.Jai Ambey Hydraulics – Power You Can Trust, Performance That Delivers.

Jai Ambey Hydraulics – Core Drilling Solutions The Jai Ambey Hydraulics Core Drill is a high-capacity truck- and track-mounted core drilling rig, engineered for demanding exploration projects. With a drilling capability of 500 m to 1200 m (NQ depth), it delivers powerful performance, precision control, and reliable operation across varied geological conditions. Jai Ambey Hydraulics – Precision Core Drilling You Can Rely On.

TYPES OF DRILLING RIGS

DTH (Down-the-Hole) Drilling Rig
DTHR (Down-the-Hole with Rotary) Drilling Rig
Core Drilling Rig (Diamond Core Rig)
Blast Hole Drilling Rig
Excavator-Mounted Drilling Rig
Geotechnical Drilling Rig
Exploration Drilling Rig
Mining Drilling Rig
Quarry Drilling Rig
Anchoring & Micropiling Drilling Rig

JAI AMBEY HYDRAULICS

Manufacture All Type of Rigs & Drilling Equipment
